Subject: RE: future conf calls

Chris

Before we have a call I would like some clarification on some outstanding issues:

Will CHK allow the installation of a temporary monitoring well as discussed at several recent meetings/calls?
Our position on sampling nearby surface waters is that they may at times be connected to the underlying drinking water aquifer, have the possibility to influence aquifer water quality, and are therefore within the scope of the study. Does CHK agree with this or dispute it? If the latter, why?
Is it acceptable to CHK to complete a QAPP that covers all baseline activities up to but not including well construction?
Does CHK understand that this is a research study as opposed to a compliance investigation?
having some clarification on these issues will help guide future agendas for calls/meetings.

Subject: future conf calls

Chris

As we get back on track with respect to weekly calls, please insure that I am available before scheduling the call. As we discussed last Friday, the next best time may be this Friday Nov 4.

Bob
